SUMAN KEMMANNAKERI

AWS DevOps Engineer

sumankemmannakeri1096@gmail.com | Bangalore, Karnataka | +91 7975161997

PROFILE

AWS DevOps Engineer with 5+ years of experience in Cloud Infrastructure, CI/CD Automation, Kubernetes Administration, Infrastructure as Code, and Production Support. Skilled in AWS, Azure DevOps, Kubernetes, Docker, Terraform, Helm, Jenkins, Ansible, and Linux. Experienced in managing cloud-native applications, automating deployments, supporting cloud migration initiatives, implementing HTTPS remediation, and maintaining highly available enterprise platforms.

TECHNICAL SKILLS

AWS (EKS, EC2, IAM, S3, Route53, ACM, CloudWatch, Secrets Manager, RDS), Azure DevOps, Azure Repos, Azure Pipelines, Jenkins, Git, Docker, Kubernetes, Amazon EKS, Helm, Terraform, Ansible, Grafana, Prometheus, CloudWatch, Linux (RHEL), Windows, Apache Tomcat, Apache HTTP Server

CERTIFICATION

AWS Certified Developer Associate

EXPERIENCE

Capgemini Technology Services India Ltd, Bangalore Feb 2025 - Present

DevOps Consultant

- Administer AWS EKS clusters and Kubernetes workloads across development, stage, and production environments.
- Implement CI/CD pipelines using Azure DevOps, Jenkins, Git, and automated deployment workflows.
- Manage Kubernetes Deployments, Services, Ingress Controllers, ConfigMaps, Secrets, Namespaces, and Helm releases.
- Configure and support AWS services including EKS, EC2, IAM, ACM, Route53, CloudWatch, S3, and Secrets Manager.
- Led HTTPS remediation initiatives involving SSL/TLS certificate onboarding, ACM integration, trust chain validation, and secure ingress configurations.
- Managed Application Load Balancer (ALB) ingress routing and Kubernetes networking components.
- Executed production deployments, release validations, rollback planning, and post-deployment verification.
- Implemented monitoring and observability using Grafana and CloudWatch.
- Conducted root cause analysis and resolved infrastructure, deployment, authentication, and platform-related issues.

Computacenter India Pvt Ltd, Bangalore Mar 2021 - Jan 2024

AWS Cloud Engineer

- Designed and managed AWS infrastructure including EC2, S3, RDS, IAM, VPC, ELB, and Route53.
- Provisioned cloud resources using Terraform and Infrastructure as Code practices.
- Built and maintained Jenkins CI/CD pipelines integrated with Git and Maven.
- Managed Docker containers and Kubernetes deployments for cloud-native applications.
- Created CloudWatch dashboards, monitoring alerts, and operational reporting solutions.
- Automated infrastructure provisioning and deployment activities using Ansible.
- Supported migration of workloads from on-premises environments to AWS cloud platforms.
- Collaborated with development teams on build, release, deployment, and infrastructure activities.

Concentrix, Bangalore Dec 2018 - Jan 2020

Technical Support Associate

- Resolved 85% of trouble tickets on the first call without escalations.
- Achieved a customer satisfaction score of 4.3/5 and improved customer satisfaction by 25%.
- Planned, supervised, and coordinated daily activities of junior associates.
- Received the Customer Appreciation Award three times.
- Provided support for Microsoft operating systems, installation, activation, printer, internet connectivity, and update issues.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)

UBDT College of Engineering, Davangere | 2014 - 2018
